

PresenceLearning Teletherapy 101

**Teletherapy Training from PresenceLearning
Clinical Experts Now Available to School-Based
Special Education Teams**

About PresenceLearning

PresenceLearning is the leading provider of live online special education related services to K-12 schools nationwide. Our services include speech-language pathology, occupational therapy, and psychoeducational services including assessments and behavioral and mental health therapy. We connect our network of more than 1,000 licensed clinicians to school districts who need support in meeting their students' IEPs.

Now, for the first time ever, we are making our clinical expertise and our platform available to school-based special education teams so they can deliver great online services too.

Clinicians Love our Platform

"I can create my queues in advance, look and see what I need to target, and then just click on an activity and use it--it's just mind blowing!"

-Leah, CCC-SLP

Engaging platform designed for productive therapy

Teletherapy 101

Now available to support the continuation of services to students during school closures.

Package Includes:

- Live online teletherapy and tele-assessment training—plus office hours—with clinical experts
- Included through June 30 at no additional charge:
 - Access to proprietary online Telehealth Institute self-guided training modules
 - Unlimited use of therapy platform, including speech-language assessments
 - Tech support, M-F 6am - 6pm MST

Teletherapy "How To" Training Delivered By the Experts

PresenceLearning's clinical team has years of experience delivering in a teletherapy format, and has overseen millions of online therapy sessions, many conducted in-home with the support of a parent. They have developed practical, effective approaches for getting the most out of teletherapy and want to share that experience with school-based clinicians who are now facing the responsibility of adapting to online services for the first time.

Key topics include:

- Teletherapy basics—how to get up and running quickly
- Strategies for managing student focus and engagement
- Communication and training templates for parents supporting sessions at home
- Developing trust and rapport through screens
- How to make the most of the content and tools in the PresenceLearning platform

Easy for parents to supervise at home

About PresenceLearning's Award-Winning Teletherapy Platform

PresenceLearning's state-of-the-art teletherapy platform has been designed by clinicians for clinicians specifically to serve K-12 students with special needs.

Key features include:

- High fidelity sessions with crisp, clear video and sound
- Full therapy command center to help providers keep sessions on track, maintain remote control of the student's environment, and refocus the student when necessary
- Dynamic camera and video modes to focus on multiple types of intervention
- Synchronized collaborative workspace
- Evidence-based and user-generated content library with 100K+ items and therapy playlists using PresenceLearning content
- Suite of Speech and OT evaluations
- FERPA compliant to protect student privacy
- Ability for clinicians to easily and securely upload their own therapy materials

Kristin Martinez - M.A. CCC-SLP

A Message from Our Clinical Director

“Over the past ten years we’ve developed a specific expertise in conducting teletherapy sessions for K-12 students and we have a purpose-built platform that is designed by and for clinicians. We realized that the best way we can help right now is to make our platform available more broadly, and to teach school-based clinicians how to approach teletherapy, including tele-assessments.”
